SUMMARY

This report serves to fulfil the regulatory requirements set out in FINMA Circular 2016/02 "Disclosure - insurers" and describes corporate governance, risk/capital management and the solvency of the company in addition to its business activities and performance. The reporting period covers the 2021 financial year from 1 January 2021 to 31 December 2021. The annual report is deemed to be the statutory single-entity financial statements of UNIQA Re AG (UNIQA Re).

In Chapter 1 **Business activities** we present UNIQA Re and its business model. As an internal reinsurer, UNIQA Re focuses its business activities on all operative insurance companies in the UNIQA Group. The gross premium earned by UNIQA Re in 2021 amounted to EUR 1,327.1 million (EUR 1,102.3 million in 2020) and is largely dominated by non-life reinsurance from the core markets of Austria and Central and Eastern Europe. As at 31 December 2021, 100% of the shares of UNIQA Re was owned by the UNIQA Insurance Group AG, based in Vienna. The main shareholders of UNIQA Insurance Group AG are the UNIQA Versicherungsverein Privatstiftung Group (49.0%), Raiffeisen Bank International AG (10.9%) and Collegialität Versicherungsverein Privatstiftung (3.1%).

The most important figures relating to premium income, claims expenditure and investment performance are discussed in more detail in Chapter 2 **Performance.** In 2021, the assumed business has shown a loss of EUR 11.9 million compared to a profit of EUR 70.9 million in 2020. The net underwriting result after settlement with reinsurers of EUR 66.9 million was positive at EUR 55.0 million (previous year: EUR 40.4 million). The non-technical result (investment income and currency exchange rate differences) amounted to EUR 25.5 million (previous year EUR 25.1 million). In total, earnings from ordinary activities before taxes amounted to EUR 80.5 million (previous year: EUR 65.5 million).

As described in Chapter 3 **Corporate Governance and Risk Management**, the risk management system plays an important role as a component of the governance system. It defines responsibilities, processes and general rules that enable UNIQA Re to manage its risks efficiently and effectively. The clear objective is to incorporate the knowledge gained from the risk management system - from risk identification to risk assessment - into strategic and key corporate decisions. To achieve this goal the process for the company's own risk and solvency assessment (ORSA) also plays an important role.

Chapter 4 **Risk profile** describes the risk profile of UNIQA Re. Market, insurance and credit risks are quantified in accordance with the requirements of FINMA circular 2017/03 "SST". The underlying risk measure is the 99% tail value at risk over a time horizon of one year. The risk profile is dominated by the insurance risk (centered) with a capital requirement of EUR 247.3 million, which mainly results from the large portfolio of non-life reinsurance treaties. At EUR 110.3 million, the second highest capital requirement is market risk (centered), which is far below the insurance risk due to the ALM-driven investment portfolio. At EUR 92.6 million, the credit risk has the lowest capital requirement. UNIQA Re is not significantly exposed to operational and other risks and is also well diversified as the reinsurer of all UNIQA Group companies.

Chapter 5 **Valuation** deals with the market-consistent values of assets and liabilities and their calculation. As at 31 December 2021, the balance sheet of UNIQA Re, shows assets of EUR 2'305.0 million and liabilities of EUR 1'641.5 million. In addition, the methods used for solvency purposes to measure individual balance sheet items are compared with the methods used for measurement in the

statutory financial statements. The provisions for insurance liabilities in particular show significant differences in valuation. While the provisions in the statutory financial statements essentially correspond to the ceded provisions, the best estimate of the insurance liabilities is calculated using actuarial methods for the market-consistent balance sheet.

The capital planning of UNIQA Re and the equity as shown in the annual report are described in Chapter 6 **Capital Management.** The main objective of capital planning is to ensure that the available own funds are sufficient at all times to meet regulatory requirements. The capitalisation of UNIQA Re should therefore be structured in the medium term in such a way that at least an SST ratio between 125% and 135% is maintained. In general, the solvency ratio is steered by strategic measures that lead to a reduction in capital requirements and/or increase existing capital. The time horizon for capital planning is the same as the time horizon for business planning and includes the five financial years following the current financial year. As of 31 December 2021, the equity reported in the annual report amounted to EUR 402.1 million. The difference between the market-consistent assets and liabilities valued for solvency purposes amounted to EUR 663.2 million. The difference between the two figures amounts to EUR 261.1 million and results from the different treatment of individual positions in the respective valuation approach.

Chapter 7 **Solvency** explains the solvency model, the composition of risk capital and the reported solvency ratio. The risk capital to be covered (target capital), defined in Art. 41 ISO, is at the centre of the quantitative requirements of the Swiss Solvency Test. UNIQA Re uses an adjusted standard model to calculate the target capital to determine the insurance risk and FINMA's standard models to determine the market and credit risk. In SST 2022, the target capital amounted to EUR 421.4 million. In addition to the difference between the market value of the assets and liabilities, a subordinated loan from UNIQA Insurance Group AG with a market value of EUR 51.8 million as supplementary capital is added to the risk-bearing capital. With an SST ratio of 157.2%, UNIQA Re is thus sufficiently capitalised to be able to bear extraordinary loss events or fluctuations in asset prices.

Chapter 8 **Appendices** contains the list of figures and tables, the auditor's report to the Annual General Meeting and the completed quantitative reporting templates specified by FINMA.

The information published here is consistent with the information provided in the context of reporting to FINMA pursuant to Art. 25 ISA (Annual Report) and Art. 53 ISO (SST Report).

1. BUSINESS ACTIVITIES

UNIQA Re, based in Zurich, is a reinsurance company licensed to underwrite all types of reinsurance.

UNIQA Re AG Alfred-Escher-Strasse 50 CH-8002 Zurich

UNIQA Re is supervised by the Swiss Financial Market Supervisory Authority (FINMA).

Swiss Financial Market Supervisory Authority FINMA Laupenstrasse 27 CH-3003 Berne

1.1. Business strategy

As an internal reinsurer, UNIQA Re focuses its business activities on all operative insurance companies in the UNIQA Group. No active reinsurance covers are offered in the open market. Moreover, the underwriting of assumed treaty reinsurance is not tied to any growth targets. Rather, the risk and capital management functions are at the forefront within the framework of the current group guidelines.

UNIQA Re thus contributes to the profit maximisation target of the group. At the same time, however, the company is subject to an independent earnings target for its own business operations.

Since 2014, with a few exceptions, all mandatory covers of the UNIQA Group companies have been in the UNIQA Re portfolio. In addition, UNIQA Re is gradually winding up or releasing the reinsured provisions of former group companies. The UNIQA Group companies offer a comprehensive range of insurance and pension products and their benefits cover property and casualty insurance as well as life insurance and health insurance in Austria and in almost all Eastern European markets. The majority of cessions to UNIQA Re come from property and casualty insurance. They include non-life insurance for private individuals and companies as well as private accident insurance.

With its extensive presence, the UNIQA Group is one of the leading insurance groups in its two core markets of Austria and Central and Eastern Europe.

UNIQA Re's gross premium earned in 2021 amounted to EUR 1,327.2 million and is largely dominated by non-life reinsurance. The significant increase compared to the previous year is due to the first-time reinsurance in 2021 of the companies in Poland, the Czech Republic and Slovakia acquired from the Axa Group in 2020.

The following diagrams illustrate the premium split by cedent, line of business and contract type.

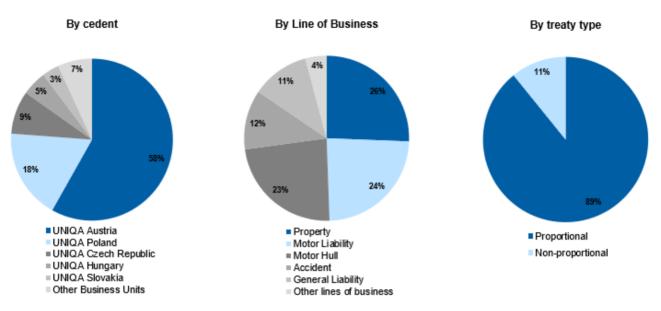

Figure 1 Distribution of earned premiums in financial year 2021

1.2. Group affiliation

UNIQA Re belongs to the UNIQA Group, whose ultimate parent company is the UNIQA Insurance Group AG with headquarters in Vienna. The group is subject to supervision by the Austrian Financial Market Authority (FMA).

The processes and transactions within the UNIQA Group that are relevant for UNIQA Re are described in Section 1.6

1.3. Major shareholders

As at 31 December 2021, the shares of UNIQA Re are 100% owned by UNIQA Insurance Group AG, based in Vienna, Austria. The main shareholders of UNIQA Insurance Group AG within the meaning of Article 4 para. 2 let. f ISA are UNIQA Versicherungsverein Privatstiftung (49.0%) and Raiffeisen Bank International AG (10.87%). The core shareholder Collegialität Versicherungsverein Privatstiftung holds a 3.08% stake in UNIQA Insurance Group AG. The remaining shares are in free float or are held as treasury shares. The core shareholders (UNIQA syndicate) have a voting rights agreement. The shares of UNIQA Insurance Group AG are traded on the Vienna Stock Exchange under the symbol UQA.

The following chart shows the shareholdings in UNIQA Re as at 31.12.2021.

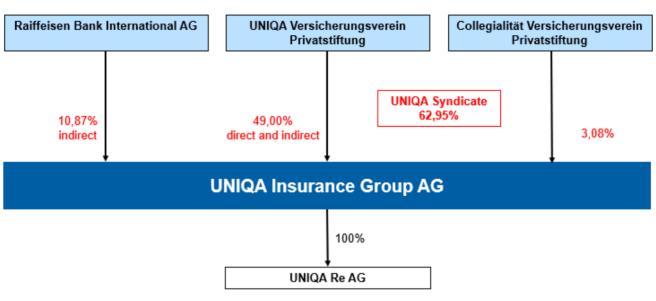

Figure 2 Shareholdings in UNIQA Re

1.4. Major branches

UNIQA Re has not established any branch offices in Switzerland or abroad.

1.5. External auditor

The external auditors of UNIQA Re are PricewaterhouseCoopers AG (PwC).

PricewaterhouseCoopers AG Birchstrasse 160 8050 Zurich

PwC undertakes all audits prescribed by law and by UNIQA Re's Articles of Association. The external auditors are appointed by UNIQA Re shareholders on an annual basis. At the Annual General Meeting on 20 April 2021, PwC was re-elected by the shareholders of UNIQA Re.

1.6. Significant unusual events

The Covid-19 pandemic continued to be a very present topic in 2021. Despite the difficult conditions, UNIQA Re AG succeeded in continuing operations without any significant restrictions or interruptions. For 2021, the exclusions in the primary insurance covers of the cedants were adjusted. In addition, a positive run-off in relation to Covid-19 claims has also become apparent due to the jurisdiction in Austria.

The company continues to monitor the impact of the pandemic and its consequences on the global economic development and in particular also with regard to asset prices, insurance exposures and its own business activities in the respective markets.

The year 2021 was characterized by an exceptionally large number of major and catastrophe losses. The two largest catastrophe losses, a tornado and hailstorm at the end of June and a flood in July,

resulted in gross losses of EUR 161.1 million for the UNIQA Group. Of this amount, UNIQA Re AG assumed EUR 142.6 million. In return, however, it was also possible to reclaim EUR 113.3 million from the retrocessionaires as a result of these events.

In the area of external retrocession, a further hardening of the international reinsurance markets could be observed in 2021 for the 2022 renewal. The exceptionally high natural catastrophe events, economic uncertainties and the persistently low interest rate environment are the reasons for the noticeable pressure on rates and conditions.

In October 2020, the UNIQA Group was able to complete the acquisition of the AXA Group companies and branches in Poland, the Czech Republic and Slovakia ("exAXA companies"). In 2021, the merger of these entities with the local UNIQA entities was completed. Thus, UNIQA Re AG also assumed the cessions of the newly merged companies for the first time in this year. This has an impact on various items in the financial year 2021. This is subsequently referred to in this report as the "integration of the exAXA companies". The reinsurance contract structures of the other UNIQA companies remained largely unchanged.

At the end of February, the conflict that has existed between Ukraine and Russia for several years escalated. UNIQA Re is the reinsurer of the Group companies in both countries. Due to the currently unassessable and continuously changing situation, no conclusive assessment of the future impact on UNIQA Re is possible at the time of preparing the financial statements. Since this is a value-creating event that will occur in 2022, there will be no impact on these financial statements as of 31 December 2021. The further development of the situation will be monitored and, if necessary, appropriate measures will be taken to minimize the impact on UNIQA Re.

On March 15, 2022, the company filed an action with the Commercial Court of Zurich for the recovery of an outstanding retrocession receivable with a value in dispute of EUR 15.7 million. The Company assumes that the receivable is still collectible. A valuation allowance has therefore not been recognized.

2. PERFORMANCE

The financial statements have been prepared in accordance with the provisions on commercial accounting of the Swiss Code of Obligations (Art. 957-963b CO). In addition to the Swiss Code of Obligations, the provisions of the Ordinance of the Swiss Financial Market Supervisory Authority on the Supervision of Private Insurance Companies (Art. 5-6a ISO-FINMA) were also applied.

The following table shows the aggregated items of the income statement for the 2021 financial year compared with the previous year.

Position	2021	2020	Change
	in EUR million	in EUR million	in EUR million
Result from underwriting business	55,00	40,44	14,56
Net investment income	28,75	10,27	18,48
Operating result	83,75	50,71	33,04
Interest expenses for interest-bearing liabilities	-2,90	-2,90	0,00
Other income / expenses	-0,33	17,71	-18,04
Profit before tax	80,52	65,52	15,00
Direct taxes	-11,19	-11,67	0,48
Profit	69,33	53,85	15,48

Table 1 Aggregated income statement

The following sections deal in detail with the underwriting result, the financial result and other significant income and expenses.

Due to the fact that most of UNIQA Re's business activities are conducted in Euros, the company has decided to keep its accounts in Euros from the 2013 financial year on.

2.1. Underwriting result

The following table compares the underwriting result of 2021 financial year with 2020 financial year.

Position	2021	2020	Change
Premiums	in EUR million	in EUR million	in EUR million
Gross premiums	1.407,0	1.096,2	310,8
Reinsurers' share of gross premiums written	-101,7	-64,1	-37,6
Premiums for own account	1.305,3	1.032,1	273,2
Change in gross unearned premiums	-79,9	6,1	-86,0
Reinsurers' share of change in unearned premiums	-8,6	3,7	-12,3
Net earned premiums	1.216,8	1.041,9	174,9
Other income from insurance business			
Other income	1,3	0,7	0,6
Insurance expenses			
Payments for insurance claims (gross)	-731,9	-672,8	-59,1
Reinsurers' share of payments for insurance claims	61,8	52,6	9,2
Payments for insurance claims for own account	-670,1	-620,2	-49,9
Change in technical provisions	-220,9	-22,4	-198,5
Reinsurers' share of change in technical provisions	112,2	-25,8	138,0
Expenses for insurance claims for own account	-778,8	-668,4	-110,4
Acquisition and administrative expenses			
Acquisition expenses	-356,0	-304,1	-51,9
Administration expenses	-6,8	-7,5	0,7

Underwriting taxes	-13,7	-11,7	-2,0			
Others	-0,7	0,0	-0,7			
Other underwriting expenses for own account	-24,7	-25,3	0,6			
Underwriting result						
Gross underwriting result	-11,9	70,9	-82,8			
Reinsurers' share of underwriting result	66,9	-30,5	97,4			
Underwriting result for own account	55,0	40,4	14,6			

Table 2 Underwriting result

There was a significant change in the composition of the UNIQA Group's operating insurance companies ceding to UNIQA Re AG compared to the previous year. In October 2020, the UNIQA Group was able to complete the acquisition of the AXA Group companies and branches in Poland, the Czech Republic and Slovakia ("exAXA companies"). In 2021, the merger of these entities with the local UNIQA entities was completed. Thus, UNIQA Re AG also assumed the cessions of the newly merged companies for the first time in this year. This has an impact on various income statement items in the 2021 financial statements. The reinsurance contract structures of the other UNIQA companies remained largely unchanged.

In the past financial year, net premiums earned increased by EUR 174.9 million year-on-year from EUR 1,041.9 million to EUR 1,216.8 million. This corresponds to 16.8%. This significant increase is due to the integration of the exAXA companies.

The year 2021 was characterized by an exceptionally large number of major and catastrophe losses. The two largest catastrophe losses, a tornado and hailstorm at the end of June and a flood in July, resulted in gross losses of EUR 161.1 million for the UNIQA Group. Of this amount, UNIQA Re AG assumed EUR 142.6 million. In return, however, it was also possible to reclaim EUR 113.3 million from the retrocessionaires as a result of these events. The run-off result from prior year claims amounted to EUR 47.0 million in 2021. Overall, net expenses for insurance claims increased from EUR 668.4 million to EUR 778.8 million, which corresponds to a change of EUR 110.4 million or 16.5%. The integration of the exAXA companies also contributed to this increase.

Acquisition and administrative expenses, largely consisting of commissions from the proportional assumed business, increased (from EUR 308.5 million to EUR 359.6 million for own account). As a percentage of net premiums earned, however, the figure remained nearly unchanged at around 29.6%. The absolute increase is due to the integration of the exAXA companies.

Taking into account the other underwriting items, the net underwriting result after settlement with reinsurers and after own costs was EUR 55.0 million, EUR 14.6 million higher than in the previous year (EUR 40.4 million).

The following table shows the development of the segments from financial year 2020 to financial year 2021.

	То	tal	Personal	accident	Неа	alth	Мо	tor
Position	2021	2020	2021	2020	2021	2020	2021	2020
	in EUR million							
Premiums and other income	1.218,2	1.042,6	154,6	149,1	6,9	6,4	616,1	462,8
Insurance Expenses	-778,8	-668,4	-67,5	-77,0	-4,9	-6,1	-381,0	-267,2
Acquis./Adm./Other Expenses	-384,4	-333,8	-66,4	-64,5	-0,9	-0,2	-180,0	-141,3
Result	55,0	40,4	20,7	7,6	1,1	0,1	55,1	54,3

	Marine, Transport		Property		Casualty		Miscellaneous	
Position	2021	2020	2021	2020	2021	2020	2021	2020
	in EUR million	in EUR million	in EUR million	in EUR million				
Premiums and other income	10,3	8,0	261,3	271,2	143,3	127,2	25,7	17,9
Insurance Expenses	-6,6	-7,9	-207,6	-182,5	-93,8	-118,5	-17,4	-9,2
Acquis./Adm./Other Expenses	-2,7	-1,4	-82,2	-77,2	-37,8	-38,3	-14,4	-10,9
Result	1,0	-1,3	-28,5	11,5	11,7	-29,6	-6,1	-2,2

Table 3 Underwriting result by segment

Personal accident and Casualty: A positive run-off in relation to Covid-19 claims which are mainly in this segment has become apparent due to the jurisdiction in Austria (main driver disease business interruption). In the segment Motor the positive loss development due to Covid-19 and lock down situations in many of the UNIQA countries was much lower than in 2020. The previously mentioned exceptionally large catastrophe losses are represented in the segments Motor and Property. A further reason for increased volumes in premiums and costs compared to previous year is the integration of the exAXA companies.

2.2. Financial result

The following table compares the investment income and expenses for the 2021 financial year with the previous year.

Position	in EUR Thousand		in EUR Thousand		in EUR Thousand	
laure et an en et in e en e	Return		Write-ups		Realised gains	
Investment income	2021	2020	2021	2020	2021	2020
Real estate	1,3	132,1	0,0	0,0	0,0	7.247,7
Fixed-interest securities	17.654,1	15.923,5	3.702,0	11,8	783,3	4.359,1
Loans	4.752,1	4.765,1	0,0	0,0	0,0	0,0
Other investments	363,9	62,9	0,0	0,0	5.407,6	0,0
Total	22.771,4	20.883,6	3.702,0	11,8	6.190,9	11.606,8

Position	Position in EUR Thousand		in EUR Thousand		in EUR Thousand	
1	Expenses		Depre	ciation	Realised losses	
Investment expenses	2021	2020	2021	2020	2021	2020
Real estate	0,0	729,5	0,0	23,4	0,0	0,0
Fixed-interest securities	0,0	0,0	2.403,8	16.831,6	50,7	3.110,4
Loans	0,0	0,0	0,0	0,0	0,0	0,0
Other investments	0,0	0,0	423,7	75,3	0,0	0,0
Total	0,0	729,5	2.827,5	16.930,3	50,7	3.110,4

Table 4 Investment income and expenses

Real estate: As real estate is not part of the strategic asset allocation of the company, an office building in Geneva was sold in 2020. There was a realised gain out of this transaction in the amount of EUR 7.3 million.

Fixed-interest securities: The reason for the write-ups and depreciations on this item lies in its valuation according to the straight-line cost amortization method and in the change in currency exchange rates. There were significant losses out of the currencies PLN, CZK and HUF in 2020. The exchange rate development for holdings in foreign currencies was significantly more favourable in 2021. The realised gains and losses stem from maturities and portfolio restructurings.

Loan: Unchanged interest income from a loan granted to the parent company UNIQA Insurance Group AG in the amount of EUR 215 million with a term until 2026.

Other investments: This item consists of one equity fund (UNIQA World Selection). In 2021, a certain number of shares of this fund were sold in order to make some realized gains.

It should also be noted that the sum of the items in Table 4 "Income and expenses from/for investments" cannot be reconciled directly to the income statement items "Investment income" and "Investment expenses", since certain income and expenses cannot be allocated to the balance sheet item "Investments" (e.g. deposits on assumed reinsurance business, cash and cash equivalents). The income statement items also include asset management costs and other investment expenses.

In the 2021 financial year, as in the previous year, no gains or losses were recognised directly in equity.

2.3. Interest expenses for interest-bearing liabilities

For the subordinated loan received from the parent company UNIQA Insurance Group AG at the end of 2016 in the amount of EUR 50 million (risk-absorbing capital instrument in risk-bearing capital), the interest payment in 2021 remained unchanged at EUR 2.9 million.

2.4. Other income and expenses

The following table compares the other income and expenses of the 2021 financial year with those of the 2020 financial year.

Position	in EUR Thousand		Position	in EUR Thousand	
Other income			Other expenses		
Other income	2021	2020	Other expenses	2021	202
Exchange rate differences	1.394,4	19.110,4	Exchange rate differences	1.708,7	744,
Other	14,5	217,7	Other	29,1	879,
Total	1.408,9	19.328,1	Total	1.737,8	1.623,

Table 5 Other income and expenses

Other income and expenses mainly relate to exchange rate differences from the valuation of provisions, deposits retained on assumed reinsurance business and accounts receivables and payables on reinsurance business.

The difference between these amounts and the previous year is therefore due to the development of the corresponding exchange rates. In 2020, there were significant exchange rate gains in the currencies PLN, CZK and HUF on those positions.

3. CORPORATE GOVERNANCE AND RISK MANAGEMENT

3.1. Corporate governance

Board of directors

The board of directors is the responsible body for the overall management, supervision and control of UNIQA Re. It is authorised to take decisions on all matters which are not reserved or delegated to another body by law, the articles of association or the organisational regulations.

As at 31 December 2021, the Board of Directors of UNIQA Re consisted of three members:

- Dr. Andreas Brandstetter (Chairman of the Board of Directors)
- Kurt Svoboda (Vice Chairman of the Board of Directors)
- Mrs. Jutta Kath (Member of the Board of Directors)

There were no changes in the composition of the Board of Directors during the reporting period.

The board of directors formed the combined risk and audit committee in 2019, which meets twice per year. In 2021 the board of directors performed its duties and obligations during the ordinary meetings of the board of directors. The board of directors meets at least once every six months. In addition to the non-transferable duties pursuant to Art. 716a OR, the duties, competencies and responsibilities of the Board of Directors include, among other things:

- The ultimate supervision of the operational management of the company, in particular with regard to compliance with the relevant laws, risk management and the internal control system (ICS).
- The appointment and dismissal of the persons entrusted with the management and representation of the company as well as the regulation of signatory powers.

 The definition of principles for capital structure and capital resources, as well as for monitoring compliance with solvency regulations.

In accordance with UNIQA Re's organisational regulations, certain transactions and measures that fall within the remit of management require the approval of the board of directors. In all other respects, the board of directors has fully delegated the management of the company to the executive board.

Executive board

On 1st January 2019, Dr. Sylva de Fluiter took over the management as Chief Executive Officer. She was the only member of the executive board in 2021.

The executive board is responsible for managing the day-to-day business in accordance with the tasks delegated to it and within the scope of the powers granted to it by the board of directors. It reports directly to the board of directors. The board of directors is represented by a member appointed for the supervision of the executive board, in particular with regard to the management of current business and compliance with the resolutions of the board of directors.

The Chief Executive Officer is supported by the Chief Financial and Risk Officer in the management of all operational activities. They form the extended management board of UNIQA Re.

The following diagram shows the extended management board of UNIQA Re.

Figure 3 Extended management board of UNIQA Re at 31.12.2021

3.2. Risk management

The risk management system as a component of the governance system serves to identify, evaluate and monitor short and long-term risks to which UNIQA Re is exposed. The guidelines of the UNIQA Group serve as the basis for uniform standards within UNIQA Re.

The ultimate supervision of the operational management of the company, in particular regarding compliance with the relevant laws, risk management and the internal control system (ICS), is the responsibility of the Board of Directors. The operational organisation of the risk management system comprises the CFRO function, the Risk Management Committee and the risk management function.

Risk strategy

The risk strategy describes how the company deals with risks that represent a potential threat to the achievement of strategic business objectives. The main objectives are to maintain and protect the financial stability and adequate profitability of the reinsurance business. The risk strategy is prepared by the risk management function and decided by UNIQA Re's management and Board of Directors. A central element of the risk strategy is the determination of risk appetite. UNIQA Re prefers risks that it can influence and control efficiently and effectively. Insurance risks are at the forefront of the risk profile.

The following chart provides an overview of the defined risk preference broken down by risk category:

Dials Catagory	Risk preference				
Risk Category	Low	Medium	High		
Underwriting Risk Non-Life			Х		
Underwriting Risk Life	Х				
Market Risk		Х			
Credit Risk		Х			
Liquidity Risk		Х			
Operational Risk	Х				
Reputational Risk	Х				
Strategic Risk	Х				

Table 6	Overview	of risk	preferences
1 4010 0	0.00101011	0111010	p101010110000

UNIQA Re defines its risk appetite based on the SST model (the components of the model are described in more detail in Section 7.1). UNIQA Re defines a target corridor based on the SST ratio.

Risk management process

The risk management process provides regular information on the risk situation and enables the management to take the measures to achieve long-term strategic goals. The process focuses on company-relevant risks and is defined for the following risk categories:

- Insurance risk
- Market risk
- Credit risk
- Liquidity risk
- Operational risk
- Emerging risks

For these risk categories, risks are regularly identified, assessed and reported. The underlying risk management process can be divided into five steps:

- 1. Identification
- 2. Measurement/Evaluation
- 3. Control
- 4. Monitoring
- 5. Reporting

Risk identification is the starting point for the risk management process. Different approaches are applied where all risk categories, departments, processes and systems are included. The risk categories including insurance, market and credit risk are assessed using quantitative methods in the SST. The results are used to identify the risk drivers and to analyse whether the risk situation is adequately reflected. The other risk categories are assessed qualitatively. The process for managing and monitoring risks focuses on continuously reviewing the risk environment and fulfilling the risk strategy. In addition to regular reporting to the Risk Management Committee and at Board of Directors meetings, various reports are prepared for the Executive Board and the Board of Directors. These include the SST and ORSA reports as well as the ICS report and the Liquidity report. UNIQA Re's most significant risks are additionally summarised and monitored quarterly in a "Heat Map".

Risk Management Committee

The Risk Management Committee forms a central element of the risk management organisation and is responsible for managing the risk profile and the associated determination and monitoring of the risk-bearing capacity and limits.

ORSA

UNIQA Re's own risk and solvency assessment (ORSA) process is based on a prospective approach which is at the centre of the corporate development strategy and the planning process, but also of the overall risk management concept. The main components of the ORSA are:

- Prospective approach
- Overall risk profile
- Total capital requirement
- Risk-mitigation measures

Risk management is providing the relevant inputs for the ORSA. The current risk profile and material strategic decisions are considered within the framework of the ORSA. This ensures an effective and efficient management of UNIQA Re's risks and is therefore a fundamental element for fulfilling regulatory capital requirements and assessing the total capital requirement.

Risk management function

The risk management function is led by the head of the Actuarial and Risk Management department / CFRO. It regularly carries out an independent assessment of UNIQA Re's main risks and the appropriateness of the risk management system and prepares reports for the Board of Directors. Organizationally, the risk management function reports to the Chief Executive Officer. The risk management function within UNIQA Re is independent of other control functions.

In particular, the risk management function performs the following tasks:

- Risk identification, monitoring and reporting of the relevant risks
- Calculation of risk and target capital as part of the Swiss Solvency Test (SST)
- Preparation of the report on the company's own risk and solvency assessment (ORSA)
- Monitoring of limit systems for UNIQA Re's risk exposure
- Preparation and implementation of the Risk Management Committee

Compliance function

The compliance function is performed by an employee of Actuarial and Risk Management. It carries out an independent annual assessment of UNIQA Re's main compliance risks and prepares reports for the Board of Directors. Organizationally, the compliance function reports to the Chief Financial and Risk Officer. The compliance function within UNIQA Re is independent of other control functions.

In particular, the compliance function performs the following tasks:

- Creation of a compliance plan describing the activities of the compliance function for the next year.
- Preparation of regular compliance reports (Risk Management Committee, UNIQA Group Compliance, Board of Directors, Supervisory Board).
- Identification and assessment of the compliance risks associated with non-compliance with legal requirements in the individual departments and thus the risk exposure of the company (annual compliance risk analysis).
- Assessment and monitoring of compliance with applicable (regulatory) provisions and whether such compliance is promoted by effective internal procedures within the company.
- Ensure that sufficient preventive measures have been taken to avoid non-compliance. This includes in particular employee training.

Internal audit

Internal audit at UNIQA Re was outsourced to UNIQA Insurance Group AG. It reports directly to the UNIQA Re Board of Directors. Internal Audit is organisationally and operationally independent of the other control functions and has unrestricted access, disclosure and auditing rights within UNIQA Re. The Internal Audit department performs the following tasks:

- Preparation of a periodic risk-based audit plan approved by the Board of Directors
- Carrying out an annual risk assessment of the specified test objects
- Report to the Board of Directors on all significant findings of the audit

Internal control system

UNIQA Re's internal control system (ICS) ensures that process risks are minimised or eliminated through effective and efficient controls. The objectives of the ICS are the effectiveness of business processes, the reliability of financial reporting and compliance with regulatory requirements.

In addition to regulatory requirements, emphasis is placed on transparent and efficient process design. An internal control system has therefore been implemented for all processes in which significant financial, operational and/or compliance risks may arise.

The basis for the implementation of the internal control system is the company-wide ICS standard, which defines the minimum requirements regarding organisation, methods and scope.

UNIQA Re's ICS standard makes the implementation of at least the following processes mandatory:

- Balance Sheet Preparation
- Asset Management
- Risk management
- Reinsurance
- IT
- Compliance
- Large Claims Handling
- Reserving

For each of the mentioned processes there is a process owner who is responsible for the organisation of an effective internal control system within his area of responsibility.

According to the ICS standard, the following activities are regularly carried out for each of the processes described above.

- Process documentation
- Risk identification and control definition
- Implementation and documentation of controls
- Evaluation of risks and controls
- Monitoring
- Reporting

Each person responsible for the process prepares an ICS report on an annual basis, which reports on the implementation of controls as well as on existing weaknesses and planned measures. The ICS officer at UNIQA Re prepares an ICS summary report for the company. It serves the Board of Directors as a means to supervise the ICS.

4. RISK PROFILE

The solvency capital requirement (target capital) of UNIQA Re is determined in accordance with the requirements of Circular 2017/03 "SST" (more detailed information on the model used can be found in Section 7.1). The one-year risk capital included in the target capital is calculated by aggregating the various risk modules, taking correlation effects into account. The effect of scenarios that are not adequately reflected in the risk modules is also considered. The underlying risk measure is the 99% tail value at risk over a time horizon of one year.

The following table shows the risk profile and capital requirements per risk category as they are included in the calculation of UNIQA Re's one-year risk capital as at 31 December 2021 (undiversified and after diversification).

Position	in EUR million	in %
Market, Insurance and Credit risk	318,5	
Market risk	110,3	24,5%
Credit risk	92,6	20,6%
Insurance risk	247,3	54,9%
Diversification effect	-131,7	

Table 7 Capital requirement (target capital) per risk category

The risk profile is dominated by the insurance risk with a capital requirement of EUR 247.3 million, which mainly results from the large portfolio of non-life reinsurance treaties.

At EUR 110.3 million, the second highest capital requirement is market risk, which is far below underwriting risk due to the ALM-driven investment portfolio.

At EUR 92.6 million, the credit risk has the lowest capital requirement.

The diversification effects of EUR -131.7 million result from the joint distribution of market, credit and underwriting risk.

UNIQA Re is not exposed to significant off-balance sheet items and has not transferred any risks to special purpose vehicles (SPVs).

For more detailed information on the quantified risk categories and on operational and other significant risks to which UNIQA Re is exposed, please refer to the following sections.

4.1. Insurance risk

UNIQA Re underwrites reinsurance business with UNIQA Group companies in almost all property and casualty lines of business (non-life). Health and life reinsurance have no material effect on UNIQA Re's risk profile.

Non-life insurance risk is generally defined as the risk of loss or adverse changes in the value of insurance liabilities. This risk category dominates with a 54.9% share of undiversified risk capital for the sum of insurance, market and credit risks. The risk category is divided into premium risk and reserve risk. Premium risk refers to the risk of a loss due to an increase in losses in the coming year, for example due to a higher loss frequency or higher average losses than expected. This includes in particular the risk of individual events (large losses exceeding a predefined loss amount) and the risk of natural hazards (accumulation events). The reserve risk refers to the risk of a loss due to an adverse development in claims settlement, for example due to a higher number of IBNR losses than expected.

Without retrocession, a large part of UNIQA Re's premium risk would be attributable to the risk from natural hazards, since this is where the accumulated sums insured are significant and there is also the risk of accumulation of many smaller losses. However, retrocession reduces the premium risk to such an extent that the reserve risk predominates. After diversification, the corresponding total risk capital for these risks amounts to EUR 247.3 million (the detailed quantification and breakdown of the centered underwriting risk can be found in Section 7.2).

In addition to the annual analysis of underwriting risks as part of the SST, further assessments are made at a granular level. UNIQA Re's reinsurance managers regularly analyse the risk profiles of cedents at sub-line of business level. In addition, UNIQA Re receives every year a detailed list of the cedents' exposure to natural hazards. Analyses are also carried out during the year in accordance with the SST procedure if material changes in the composition of the portfolio or in the structure of the retrocession are to be expected.

The risk concentration in underwriting risk results from a possible geographical accumulation of risks. UNIQA Re's main concentration risk is the natural catastrophe risk, in particular the natural hazards of storms, floods, earthquakes and hail. All these natural hazards have the potential to affect a geographically large area. Due to the geographical concentration of reinsurance business in Central and Eastern Europe, a major natural event can cause many claims. A concrete example of such a scenario is a possible flood along the Danube. Catastrophe risk is measured by using natural catastrophe models from various external providers.

UNIQA Re's main risk-reducing measure is the purchase of retrocession. The scope and structure of retrocession of underwriting risks to reinsurers outside the group are analysed annually and adjusted if necessary. In particular, the external reinsurers provide sufficient reinsurance coverage to cover possible accumulation of events. The effectiveness of retrocession is ensured by at least annual evaluations (through simulations) of capital requirements before and after application of the corresponding retrocession structure. These evaluations are carried out both at line of business level and for UNIQA Re's entire insurance risk.

There were no significant changes in insurance risk during the reporting period.

4.2. Market risk

Market risk reflects the sensitivity of market-consistent values of investments and other assets, insurance liabilities and other liabilities to changes in the following factors: interest rates, credit spreads above the risk-free yield curve, foreign exchange rates and market prices of equities. With a share of 24.5% of undiversified risk capital, this risk category plays a smaller role than insurance risk for the undiversified sum of insurance, market and credit risks.

UNIQA Re operates an active asset and liability management system and selects investments according to the criteria of return, creditworthiness and appropriate diversification. The group-internal asset manager UNIQA Capital Markets GmbH supports UNIQA Re in choosing the investment strategy. The assignment for operational implementation to the portfolio manager is formulated within the framework of a mandate and formally approved by UNIQA Re. The mandate defines the Strategic Asset Allocation (SAA), the investment classes (investment universe) and internal and external limits. In the SAA, a matching portfolio is defined which is oriented towards the payment pattern of technical

provisions and generates a stable cash flow. A surplus portfolio serves to optimise returns and is hedged by a stop loss strategy.

UNIQA Re's investments consist largely of fixed-interest securities with medium to high credit ratings (61.8% of total investments). Other significant items are a loan granted to UNIQA Insurance Group AG (12.0%) and investments in investment funds (21.3%).

Since most investments are interest-bearing, changes in the interest rate level (interest rate risk) and the risk premiums dependent on the issuer (spread risk) have a considerable effect on the value of the investments and are therefore the main risk drivers. Following a new investment policy, the portfolio's asset classes have been extended to include senior loan funds as well as private debt.

The total undiversified risk capital for all market risks amounts to EUR 174.4 million as at 31 December 2021. After diversification and deduction of the expected financial result, the total risk capital for market risks amounts to EUR 102.5 million (the detailed quantification and breakdown of the centered market risk can be found in Section 7.2).

UNIQA Re calculates the market risk in accordance with the standard model prescribed by FINMA. Based on this model, the composition of the portfolio is analysed and assessed annually as part of the Swiss Solvency Test. The composition of the current and possible future portfolio and the associated risks are also observed and discussed in regular meetings with UNIQA Capital Markets GmbH. In addition to this strategically oriented assessment, Group Risk Management of the UNIQA Group prepares a bi-weekly investment limit report and a quarterly limit report in which compliance with the defined limits for all risk categories (including insurance and credit risk) is monitored.

To avoid high concentrations in investments and to achieve the broadest possible diversification of risk, target ranges are defined as part of the SAA (Strategic Asset Allocation). In addition to investing in various asset classes, diversification is achieved by investing in various regions and durations within an asset class. As at 31 December 2021, there were only 18 positions among the fixed-interest securities with a market value of more than EUR 10.0 million and the maximum position amounting to EUR 35.1 million. Deposits on assumed reinsurance business of individual group companies may be higher in some cases but are harmless with regard to the same currency and structure as the corresponding provisions. The loan to UNIQA Insurance Group AG of a nominal EUR 215 million represents a concentration but is put into perspective if Group affiliation is considered.

In order to reduce risk, UNIQA Re aims to provide congruent cover for insurance liabilities in terms of currency and duration (see description at the beginning of this section). As at 31.12.2021, UNIQA Re did not use any derivative financial instruments to hedge balance sheet items.

4.3. Credit risk

The credit risk takes account of possible losses that may result from an unexpected default or deterioration in the creditworthiness of counterparties and debtors during the following twelve months. The most important counterparties of UNIQA Re, besides the members of UNIQA Group, are various issuers of fixed-interest securities (mainly government and corporate bonds), external retrocessionaires (risk of retrocessionaire default) and Credit Suisse (Schweiz) AG, where cash is hold in various currency accounts.

The total credit risk exposure as at 31 December 2021 amounts to EUR 2,359.0 million. The following table shows the breakdown of credit risk exposure by rating category.

	in Mio. EUR	in %
ААА	184,4	7,8%
АА	431,1	18,3%
A	1025,3	43,5%
BBB/Not rated	569,4	24,1%
BB	67,9	2,9%
В	67,8	2,9%
CCC-D	13,0	0,6%
Total	2359,0	100,0%

Table 8 Credit risk exposure by rating

The credit risk of EUR 92.65 million, accounting for 20.6% of undiversified risk capital, plays a minor role in the sum of insurance, market and credit risks.

The credit risk in UNIQA Re is determined with using of new model for credit risk introduced by FINMA in 2020. The new model is based on stochastic single-factor model (Merton approach). In contrast, the old model was based on the Basel III standard approach. The ratings of retrocessionaires are updated on a quarterly basis and receivables from group units are escalated if they are not met in time.

The risk of potential concentrations through the transfer of reinsurance is reduced by limiting the retrocessionaire's share of the reinsurance treaty. For this purpose, UNIQA Re has defined a reinsurance standard that regulates the selection of counterparties and avoids such external concentrations and that each reinsurer must have at least a Standard & Poor's (S&P) rating of "A-" or equivalent rating published by an external credit assessment institution used by UNIQA Group).

The loan granted to UNIQA Insurance Group AG with a nominal value of EUR 215 million represents a concentration risk but is relativized on the basis of group affiliation.

There is a noticeable increase in receivables which are in the scope of credit risk. Receivables from inward and outward reinsurance according to IFRS amount to EUR 229.1 million at 31.12.2021 in comparison to the last year (EUR 62.4 million at 31.12.2020). The reason is receivables from newly acquired AXA operations in Poland, the Czech Republic, and the Slovak Republic which was legally closed on 15.10.2020. The contracts between UNIQA Re and these new entities were concluded in 2021.

Minimum ratings for external reinsurers and upper limits for the ceded exposure per reinsurer were defined to reduce risk. Compliance with the requirements is checked regularly, especially during renewal. If a reinsurer falls below the rating "A-", a deposit in the amount of the retroceded loss reserves is required. There was no such a case in 2021.

UNIQA Re does not use credit derivatives or other instruments to hedge the credit risk. When selecting fixed-interest securities, UNIQA Re targets an average rating of BBB- or better.

4.4. Operational risk

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, personnel or systems, or from external events and shall include legal risks, and exclude risks arising from strategic decisions, as well as reputational risks. The risk management process for operational risks is designed in such a way that existing or future risks are identified and potential losses for UNIQA Re are avoided or at least reduced. The process consists of the following five steps:

- 1. Risk and Context Identification
- 2. Risk Assessment
- 3. Targets and Limits Monitoring
- 4. Monitoring and Controlling
- 5. Reporting

In terms of operational risk, UNIQA Re is not comparable with reinsurers operating in the open market. On one hand, the processes are standardized and are not subject to permanent changes and, on the other hand, the human risk or system risk is small due to the professional staff and the controlled outsourcing to an experienced IT partner.

In order to minimise operational risks in business processes, UNIQA Re uses an appropriate internal control system so that effective controls are strictly monitored and the reduction of such business process risks to a minimum can be guaranteed. All other operational risks are recorded and assessed in the GRC tool, the compliance risk analysis and the business continuity management system. If necessary, measures will be developed.

4.5. Other significant risks

Other significant risks include liquidity risks, reputational risks, strategic risks and emerging risks.

Liquidity risk is the risk that the (re)insurer is not able to meet its payment obligations in full and/or on time or that it will have to accept losses on short-term sale of investments in order to meet its payment obligations. Management is informed about UNIQA Re's liquidity risks in a separate liquidity report. The main part of this report compares the expected cash inflows and outflows over the planning period and evaluates adverse scenarios. Due to the coordination of investments with insurance liabilities (asset liability management) and the avoidance of short-term liquidity bottlenecks through coordinated retrocession, there is only low liquidity risk for UNIQA Re.

Reputation risk is the risk of negative economic effects that could result in damages to UNIQA Re's reputation. Due to the embedding of UNIQA Re in the UNIQA Group and the exclusive underwriting of intra-group business, however, there is no significant reputational risk for UNIQA Re.

Strategic risk is defined as the risk arising from inaccurate business decisions, poor implementation of processes or a lack of adaptability due to changes in the market. The strategic risk of UNIQA Re is analogous to the reputation risk. UNIQA Re's monopoly position as the reinsurer of the UNIQA

companies excludes the risk of a lack of adaptability due to changes in the market. The risk of inaccurate business decisions is also reduced to a minimum by embedding UNIQA Re in the Group and the associated access to data and information.

Future risks, so-called emerging risks, are risks that develop from changes in existing risks or which occur for the first time in the future. New economic, technological, socio-political and ecological developments are the main drivers of emerging risks. Emerging risks are identified and continuously monitored through the UNIQA Re Heat Map and reported to the risk management committee.

5. VALUATION

The market-consistent valuation of assets and provisions for insurance liabilities is based on the specifications in Appendix 3 ISO and Circular 2017/03 "SST".

5.1. Market-consistent asset valuation

The table on the next page shows the market-consistent value of the assets, broken down by asset class, as at 31 December 2021.

If a market value of a position existed as at 31 December 2021, this was used as a market-consistent value. This was the case for fixed-interest securities, cash and cash equivalents. The collective investment schemes were also valued at market value.

The loan granted to UNIQA Insurance Group AG is a loan with a fixed interest rate and fixed duration. The interest rate was derived on the basis of the characteristics of the loan and the debtor as well as a comparable bond of UNIQA Insurance Group AG on the capital market. The corresponding interest rate was also used for valuation at the discounted present value.

The retrocession in the life and health business is not modelled in detail due to the low volume. The retrocession structure of the non-life business is applied to the original losses or loss amounts of a ceding company. For the calculation of the best estimate provisions in the SST, an approximate breakdown of the losses according to proportional and non-proportional contracts per class, contract year and currency is carried out. On the basis of this breakdown and using the development factors that are calculated to estimate the statutory best estimate provisions before retrocession (gross), the statutory best estimate provisions after retrocession (net) are calculated. They are discounted in the same way as the gross provisions.

Position	in EUR million	in %
Investments	1.796,4	77,9%
Real estate	0,0	0,0%
Participations	0,0	0,0%
Fixed-income securities	1.110,5	48,2%
Loans	215,0	9,3%
Mortgages	0,0	0,0%
Equities	0,0	0,0%
Other investments	470,8	20,4%
Collective investment schemes	455,1	19,7%
Alternative investments	15,7	0,7%
Other investments	0,0	0,0%
Other assets	508,6	22,1%
Cash and cash equivalents	6,7	0,3%
Share of technical provisions from reinsurance	225,0	9,8%
Receivables from insurance activities and Deposits	250,4	10,9%
Other receivables	15,3	0,7%
Accrued and Fixed assets	11,1	0,5%
Total	2.305,0	100,0%

Table 9 Market-consistent value of assets

Since the retroceded loss reserves are relatively small compared to the total gross loss reserves and UNIQA Re only accepts retrocessionnaires with a rating of at least A-, the effect of considering a risk margin for incoming payments is currently immaterial from an overall perspective.

Receivables from insurance business consist of existing accounts receivable and deposits on assumed reinsurance business. Accounts receivable from reinsurance business are due both from cedents within the group and from retrocessionaires outside the group. These receivables were valued at their nominal value, as no information was known on the balance sheet date that would cast doubt on their recoverability. Deposits on assumed reinsurance business amounting to approximately EUR 21,9 million are due from intra-group cedents and result from proportional reinsurance treaties. They are discounted using a risk-adjusted interest rate.

Other receivables and other assets are stated at nominal value. As at December 31, 2021, no information was known that would affect the recoverability of the receivables.

The following table shows a comparison of the values of the assets in the statutory balance sheet with the values in the market-consistent balance sheet as at 31.12.2021.

	Statutory value (valuation for annual report)	Market-consistent value (valuation for solvency purposes)	Differences
Position	in EUR million	in EUR million	in EUR million
Fixed-income securities	1.103,7	1.110,5	6,8
Loans	215,0	215,0	0,0
Other investments	436,1	470,8	34,7
Cash and cash equivalents	6,7	6,7	0,0
Share of technical provisions from reinsurance	208,9	225,0	16,1
Receivables from insurance activities and Deposits	251,6	250,4	-1,3
Other receivables	15,3	15,3	0,0
Accrued and Fixed assets and DAC	84,9	11,1	-73,8
Total	2.322,3	2.305,0	-17,4

Table 10 Comparison of asset valuations

The statutory values were allocated to the items of the market-consistent balance sheet in such a way that a direct comparison can be made between the two values. For example, bond funds are included in the statutory balance sheet under fixed-income securities, but in the following table they are classified under collective investment schemes. The total value of the statutory assets is, independently of this, in line with the balance sheet in the 2021 financial statements.

The main differences in the principles and methods between the valuation for the annual report and the valuation for solvency purposes are described below.

Position	Valuation for annual report	Valuation for solvency purposes
Fixed-interest securities	Fixed-interest securities are valued on a straight-line basis using the cost amortization method, less write-downs on positions with a sustained loss in value.	Fixed-interest securities are valued at market value.
Loans	Loans are measured at nominal value less impairment.	The interest rate was derived on the basis of the characteristics of the loan and the debtor as well as a comparable bond of UNIQA Insurance Group AG on the capital market. The corresponding interest rate was also used for valuation at the disc. present value.
Collective investment schemes	Collective investment schemes are valued at the lower of acquisition cost or market value.	Collective investment schemes are valued at market value.
Receivables from insurance business	Receivables from insurance business are valued at nominal value.	Receivables from insurance business include deposits under proportional reinsurance contracts. These deposits with ceding companies are discounted using a risk- adjusted interest rate. Other receivables are valued at nominal value.
Other assets	Other assets include deferred acquisition costs from proportional contracts. These result from the ceded unearned premiums and the cession rate of the reinsurance treaty.	The deferred acquisition costs are set to zero.

Table 11 Differences in the valuation of assets

5.2. Market-consistent valuation of provisions for insurance liabilities

The market-consistent value of the insurance liabilities is composed of the best estimate of the insurance liabilities and the market value margin pursuant to Art. 41 para. 3 ISO (the market value margin is discussed in Section 5.3). The best estimate of insurance liabilities corresponds to the expected value of future contractually guaranteed cash flows discounted using a risk-free yield curve, considering the following principles (see Appendix 3 ISO): completeness, best estimate principle, timeliness, and transparency.

The best estimate of UNIQA Re's gross and net insurance liabilities as at 31 December 2021 amount to EUR 1554,0 million and EUR 1329.2 million, respectively. Insurance liabilities comprise unearned premium, insurance liabilities (life), reserves for losses and loss adjustment expenses, and reserves for premium refund.

The following table shows the allocation of provisions for insurance liabilities according to the types and classes of insurance as at 31.12.2021:

	Gross (before	retrocession)	Net (after ret	rocession)
Position	in EUR million	in %	in EUR million	in %
Reserves for unearned premium	210,1	13,5%	201,0	15,1%
Loss reserves	1.331,5	85,7%	1.116,9	84,0%
Accident	123,1	7,9%	123,1	9,3%
Health	3,1	0,2%	3,1	0,2%
Motor Third-Party Liability	391,0	25,2%	359,1	27,0%
Motor Hull	59,1	3,8%	35,5	2,7%
Transport	12,2	0,8%	10,2	0,8%
Property	254,0	16,3%	175,3	13,2%
General Third-Party Liability	464,7	29,9%	392,0	29,5%
Other	24,2	1,6%	18,6	1,4%
Insurance liabilities (life)	2,1	0,1%	0,9	0,1%
Reserves for premium refund	10,3	0,7%	10,3	0,8%
Total	1.554,0	100%	1.329,2	100%

Table 12 Market-consistent valuation of gross and net provisions for insurance liabilities

Reserves for unearned premium

As the non-proportional treaties usually begin on 1st of January and their terms coincide with the end of the financial year, UNIQA Re only calculates and carries unearned premium reserves for the proportional business. The cedents determine locally the premium shares to be transferred, usually on a pro rata temporis basis. The reported unearned premiums are reduced by deferred, unamortized acquisition costs as a proxy for unearned premiums after deduction of costs. The market-consistent value of the liabilities associated with the provision for unearned premiums is finally calculated by discounting the expected cash flow with the risk-free yield curve of the respective currency area.

Best estimate of gross loss reserves

The undiscounted best estimate provisions for proportional and non-proportional contracts are calculated separately by UNIQA Re (own calculation of IBNR provisions or best estimates). For this purpose, the reserves are divided into 23 reserving classes. The segmentation is based on an appropriate trade-off between the homogeneity of the risks contained in each class and the volume of the corresponding business.

For each reserving class, run-off triangles consisting of claims payments per accident and run-off year and triangles consisting of total claims expenditure (including individual claims provisions) are formed. Based on these triangles, UNIQA Re estimates an IBNR provision for each reserving class for losses not yet reported (IBNyR) or insufficiently reserved (IBNeR). The total of the individual claims provisions and IBNR provisions then results in the statutory provisions.

Standard actuarial methods are used for the estimation of the IBNyR and IBNeR provisions. As an example, for the Paid and Incurred Chain Ladder methods, development factors are first calculated based on the claims triangles mentioned above. The ultimate claims levels are calculated by applying the run-off factors to the claims known at the relevant reporting date (for the purposes of this report, 31st December 2021). Expert judgement is finally applied in weighting between these two methods, or in deviating from either of them in favour of other methods like target-loss ratio, IBNR-to-individual claim reserves, etc., based on the tail features of the different reserving classes (e.g., short VS long), as well as type of claims (e.g., attritional VS large or catastrophes). The best estimate provisions are then calculated as the difference between the estimated ultimate amount and the cumulative claims payments as at the relevant reporting date (last diagonal).

Finally, provisions for unallocated loss adjustment expenses (ULAE) are calculated in line with a methodology defined by UNIQA Group based on number of proportional contracts and open claims affecting non-proportional treaties. The allocated loss adjustment expenses (ALAE) are already included in the individual claims provisions advised by the cedents.

Discounting of best estimate loss reserves

The basis for calculating the discounted best estimate provisions is the statutory best estimate provisions. In order to determine future cash flows, run-off patterns are derived from the loss triangles.

The risk-free yield curve of the respective currency is then used to discount the resulting future cash flows. The corresponding yield curves from the current SST template are used for the currencies CHF, USD and EUR. For the other currencies, risk-free yield curves based on government bonds are used whenever possible. The risk-free yield curves from the currency areas CZK, RSD and UAH are determined based on swap curves due to unavailability of the corresponding government bond curves.

Other items

For the provisions for claim liabilities and unearned premiums in life reinsurance, the statutory value is considered as the best estimate of the liabilities. Any adjustment is negligible due to the small volume. The same simplification was undertaken for the provisions for premium refund.

The following table shows as an example the comparison of the gross provisions for insurance liabilities in the statutory balance sheet with the values in the market-consistent balance sheet as at 31.12.2021:

	Statutory balance sheet value (valuation for annual report)	Best Estimate (valuation for solvency purposes)	Difference
Position	in EUR million	in EUR million	in EUR million
Reserves for unearned premium (gross)	294.,2	210,1	-84,1
Loss reserves and loss adjustment expenses (gross incl. Life)	1.511,2	1.333,6	-177,7
Provisions for premium refund	10,3	10,3	0,0
Total	1.815,7	1.554,0	-261,8

Table 13 Comparison of valuations for gross insurance liabilities

The main differences in the principles and methods between the valuation for the annual report and the valuation for solvency purposes are described below.

Position	Valuation for annual report	Valuation for solvency purposes
Reserves for unearned premium	The unearned premiums are transferred after careful review, as reported by the cedents. They comprise the premium portion attributable to the period after the balance sheet date. Included acquisition costs are shown on the asset side as unamortized acquisition costs (no offsetting).	The reported unearned premiums are reduced by deferred, unamortized acquisition costs to approximate unearned premiums after deduction of costs. The market-consistent value of the liabilities associated with the provisions for unearned premiums is then calculated by discounting the expected cash flow with the risk-free yield curve of the respective currency.
Loss reserves	The reserves for losses and loss adjustment expenses in proportional reinsurance business are assumed as reported by the ceding companies after careful examination (comparison with actuarial best- estimates). The best estimate provisions in non- proportional reinsurance business are calculated using actuarial methods. If the calculated best estimate provisions from non- proportional business exceed the provisions made by the cedent the difference is deducted from the provisions in the proportional business. In all cases, it is ensured that the statutory loss reserves are sufficient (in particular at least as high as their market-consistent value).	The provisions for loss reserves before/after retrocession from proportional and non-proportional reinsurance business are valued using actuarial methods as the best estimate of the insurance liabilities (expected value of future contractually guaranteed cash flows, discounted with a risk-free yield curve).

 Table 14 Differences in the valuation of the provisions for insurance liabilities

5.3. Market Value Margin

Pursuant to Art. 41 para. 3 ISO, the market value margin corresponds to the capital expenditure for the risk-bearing capital to be provided during the run-off period of the insurance liabilities. The market value margin of UNIQA Re as at 31.12.2021 is EUR 65.1 million.

The market value margin was calculated using the standard model provided by FINMA (StandRe) (The models from FINMA are discussed in Section 7.1).

The future target capitals were derived from the development of the provisions as at 01.01.2022 (t=0) and the relation between the reserve risk and the best estimate of insurance liabilities. The best estimate of the liabilities as at 31 December 2022 (t=1) was estimated based the initial loss provision as at 1 January 2022, the expected claim amount (net of reinsurance) and the related incremental payment pattern.

The non-hedgeable market risk component of the MVM was not considered as the longer-term insurance liabilities cash flows represent less than 10% of the overall amount.

The retrocession credit risk in t=0 is assessed using the risk-weighted credit exposure to retrocession according to Basel III. The resulting amount was projected into the future in proportion to the settlement of the best estimates.

As an effect of the scenarios, the difference between target capital before and after aggregation of the scenarios relevant for the margin value margin was projected into the future in proportion to the settlement of the best estimates.

There were no other effects on the target capital as at 31.12.2021.

5.4. Market-consistent valuation of other liabilities

The following table shows the market-consistent value of other liabilities as at 31.12.2021:

Market-consistent value	Other liabilities	
Position	in EUR million	in %
Non-technical provisions	0,7	0,8%
Liabilities from insurance business	34,5	39,4%
Other liabilities (incl. Deposits retained on ceded reinsurance)	0,5	0,6%
Accrued liabilities	0,0	0,0%
Subordinated debts	51,8	59,2%
Total	87,5	100,0%

Table 15 Market value of other liabilities

Non-technical provisions consist of other provisions. The items liabilities from insurance business, other liabilities and accrued liabilities are valued at nominal value.

The item subordinated debts is a subordinated loan with a nominal value of EUR 50 million and a fixed duration, which UNIQA Insurance Group AG granted to UNIQA Re. The interest rate was determined on the basis of the characteristics of the loan and the borrower. The changed market conditions were considered when measuring the discounted present value as at 31 December 2021.

6. CAPITAL MANAGEMENT

Through capital management, UNIQA Re ensures that the company's capital resources are always appropriate. The main objective is to ensure that the available capital (the risk-bearing capital) is sufficient at all times to meet the regulatory capital requirements (Swiss Solvency Test). In order to ensure this over the time horizon of capital planning even under difficult conditions (e.g. after major loss events or material fluctuations in asset prices), an appropriate safety margin is sought. UNIQA Re's capital resources should therefore be structured in the medium term in such a way that at least an SST ratio of between 125% and 135% is maintained.

If the capital resources considerably exceed this target corridor in the long term, UNIQA Re can return any capital not required to the parent company as long as strategic planning permits. On the other hand, in the event of undercapitalisation, measures to strengthen the solvency ratio will be developed together with UNIQA Insurance Group AG. In general, the solvency ratio is steered by strategic measures that lead to a reduction in capital requirements and/or increase existing capital.

The ORSA process (Own Risk and Solvency Assessment), which is carried out at least once a year by UNIQA Re and includes a forward-looking self-assessment of the risk situation and capital requirements, represents the essential instrument for planning future capital requirements. Essential strategic decisions and input data from the planning process are included in the ORSA procedure in a basic scenario and under adverse scenarios. It is therefore an essential component for meeting regulatory requirements, in particular current and future solvency requirements.

The time horizon for capital planning is the same as the time horizon for business planning and includes the five financial years following the current financial year. Accordingly, in ORSA 2021, the planning years 2022 to 2026 were considered in addition to the forecast for the financial year 2021. The capital requirement is projected on the basis of business performance planning (essentially expected premiums, costs and changes in underwriting provisions) and the targeted composition of investments (strategic asset allocation).

The following table shows the structure and amount of equity reported in the annual report as at 31 December 2021 and the reconciliation from the previous year.

	01/01/2021	Shareholder allowance to statutory capital reserve	Allocatio n to statutory retained earnings	Allocation to voluntary retained earnings	Dividend distribution	Annual profit	12/31/2021
Position	in EUR million	in EUR million	in EUR million	in EUR million	in EUR million	in EUR million	in EUR million
Share capital	15,6	0,0	0,0	0,0	0,0	0,0	15,6
Statutory capital reserve	247,1	0,0	0,0	0,0	0,0	0,0	247,1
Statutory retained earnings	7,8	0,0	0,0	0,0	0,0	0,0	7,8
Voluntary retained earnings	92,3	0,0	0,0	0,0	-30,0	69,3	131,6
Equity	362,8	0,0	0,0	0,0	-30,0	69,3	402,1

 Table 16 Structure and amount of equity reported in the Annual Report

The share capital consists of 18'800 shares at CHF 1'000 each, which are exclusively owned by UNIQA Insurance Group AG in Vienna (group holding company). The statutory capital reserve consists on the one hand of the reserve from capital contributions amounting to EUR 246.3 million.

This includes earlier subsidies from the then grandparent company UNIQA Versicherungen AG in Vienna (group holding company) to the equity of UNIQA Re and for the participation in the Italian UNIQA company UNIQA Assicurazioni Spa. UNIQA Re no longer holds this participation since the end of 2014. On the other hand, the statutory capital reserve also includes the organisational fund in the amount of EUR 0.8 million. The statutory retained earnings amount to 50% of the share capital. The voluntary retained earnings consist of the profit carried forward from the previous year of EUR 62.3 million (after dividend distribution of EUR 30 million to UNIQA Insurance Group AG) and the annual profit for 2021 of EUR 69.3 million.

As of 31 December 2021, the equity reported in the annual report amounted to EUR 402.1 million. The difference between the market-consistent value of assets and liabilities for solvency purposes amounted to EUR 663.21 million. The difference between the two amounts equals to EUR 261.11 million and results from the different treatment of individual positions in the respective valuation approach. The different methods and assumptions used in the valuation can be found in sections 5.1 and 5.2.

7. SOLVENCY

7.1. Models

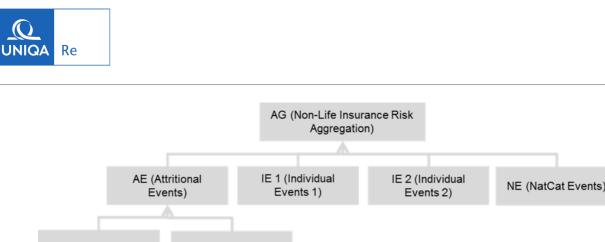

Pursuant to Art. 42 para. 1 ISO, the determination of the target capital in the SST is based on a model for quantifying the relevant risks, the evaluation of a number of scenarios, and an aggregation procedure that combines the results of the model and the scenario evaluation. The relevant market, credit and insurance risks were quantified in UNIQA Re's model for SST 2022.

The standard market risk model provided by FINMA was used to quantify market risk. Information on the standard model for market risks can be found in FINMA's document "Technical Description for the SST Standard Model Market Risk" dated 31.10.2021.

The standard model provided by FINMA was used to quantify the credit risk. Further information can be found in the FINMA document "Technical Description for the SST Standard Model Credit Risk" dated 31.10.2021.

The standard model for reinsurers (StandRe) prescribed by FINMA was used to quantify the insurance risk for SST 2022. In order to accurately reflect UNIQA Re's specific risk situation, certain company-specific adjustments were made to the standard model and approved by FINMA.

The structure of the StandRe model is specified by FINMA. It consists of various components, as the following graphic shows:

AER (Reserve Risk) AEP (Premium Risk)

Figure 4 Structure of the Standard Model for Insurance Risks

The AE module maps the premium risk (AEP) and the reserve risk (AER) for normal losses. The IE1 and IE2 modules map the risk of large losses using scenarios. Natural catastrophes are mapped using the NE module. UNIQA Re uses an internal model for the NE module, which was approved by FINMA on 16.12.2021. The various modules are aggregated in the AG module.

Further information on the modelling of the AEP, AER, IE1 and IE2 modules can be found in the FINMA document "Technical description of the SST standard model reinsurance (StandRe)" dated 31.10.2021.

The company-specific adjustments to the StandRe mainly relate to the modelling of large losses (IE1). In order to achieve detailed modelling of as many risk-relevant aspects as possible, modelling is carried out on the basis of the original business of the cedents. Based on this modelling, the existing reinsurance treaties between the cedents and UNIQA Re as well as the existing retrocession treaties between UNIQA Re and external reinsurers are then applied in the AG module. It should be noted that the retrocession agreements are also based on the original losses of the cedents and therefore require a gross modelling, which is not provided for in the StandRe.

The NE module and thus the risk from natural perils is represented according to the type of peril (flood, earthquake, windstorm and hail) and the region using various vendor models, including Impact Forecasting (ELEMENTS), CoreLogic (RQE), AIR (Touchstone) and WEHM (Vortex). For the same reasons as in the modelling of major losses, natural catastrophe losses are also modelled on the basis of the original exposure of the cedents. The application of inward and outward reinsurance also takes place in the AG module.

7.2. Target capital

Allocation of target capital

The target capital as at 31 December 2021 amounts to EUR 421.4 million. The following table shows the breakdown of target capital into its main components and a comparison with the previous year.

	SST 2022	SST 2021	Changes
Position	in EUR million	in EUR million	in %
Market risk	110,3	108,6	1,5%
Credit risk	92,6	60,4	53,3%
Insurance risk	247,3	245,6	0,7%
Diversification effect	-131,7	-73,1	80,2%
-Expected financial result	-7,8	-9,0	-13,3%
-Expected insurance result	35,6	28,4	25,2%
Scenarios effect	10,0	7,7	31,1%
Additional effects	0,0	0,0	0,0%
Market value margin	65,1	66,3	-1,8%
Target capital	421,4	434,9	-3,1%

 Table 17 Breakdown of target capital into its main components

UNIQA Re actively undertakes underwriting risks and assumes market risks where required by the business model. As a result, insurance risk is a key driver of target capital, followed by market risk and credit risk. The components of market risk and insurance risk are discussed in more detail in the following sections.

Credit risk is driven by the high proportion of fixed-interest securities and loans in the investment portfolio, as well as actual and modelled receivables and recoverables from cedents and retrocessionaires. A new modelling approach leads to a strong increase of credit risk. However, the aggregation of the insurance, market and credit risks results in a significant diversification effect.

The impact of the scenarios on the target capital is higher compared with SST 2021. The expected underwriting result after retrocession decreased compared to the previous year. The deterioration is mainly attributable to the retrocession premium increase compared with the previous year and higher expenses. The expected financial result decreased slightly compared to the previous year. The market value margin is stable due to compensating effect between scenarios and discounting.

Breakdown of market risk

The centered market risk (before diversification with insurance risk) amounted to EUR 110.3 million as at 31 December 2021. The following table shows the breakdown of market risk into its main components and compares the corresponding figures with those of the previous year.

	SST 2022	SST 2021	Changes
Position	in EUR million	in EUR million	in %
Standalone interest rate risk	30,3	35,3	-14,3%
Standalone spread risk	101,8	95,0	7,2%
Standalone currency risk	15,2	16,4	-7,2%
Standalone equity risk	27,1	34,9	-22,2%
Diversification effect	-64,1	-72,9	-12,1%
Market risk	110,3	108,6	1,5%

Table 18 Breakdown of market risk into its main components

The main drivers of market risk are spread risk, interest rate risk and equity risk. The reason for this is that the majority of UNIQA Re's investments are in fixed-interest securities. Changes in the level of interest rates and the spreads on the risk-free interest rate depending on the issuer therefore have a considerable impact on the value of the investments. Since government bonds in the EUR currency are sensitive to changes in risk spreads, spread risk is the biggest risk driver. Active asset liability management (both in terms of duration and currency) means that the interest rate risk is kept within limits. The diversification effect results from the fact that not all risk factors are perfectly correlated, but certain balancing effects occur. The currency risk mainly results from gaps in currency matching and investments in currencies that are not represented on the liabilities side (e.g. USD) and vice versa. Following a new investment strategy, the equity share through investment funds has decreased, resulting in a lower equity risk.

The share of market risk (centered, before diversification) has slightly increased compared with SST 2021. This effect is mainly attributable to an asset allocation approach with stable risk return profile. Foreign currencies that are not specified in the SST (e.g. CZK, PLN, etc.) are mapped to one of the SST currencies (EUR).

Breakdown of insurance risk

The insurance risk (centered, before diversification with market risk) amounts to EUR 247.3 million. Table 19 shows the breakdown of the insurance risk into its main components and compares the corresponding figures with those of the previous year.

	SST 2022	SST 2021	Changes
Position	in EUR million	in EUR million	in %
Reserve risk	190,0	195,7	-2,9%
Premium risk (before retrocession)	520,3	523,8	-0,7%
of which Natural Catastrophes	531,5	537,2	-1,1%
of which attritional and large losses	185,9	186,4	-0,3%
Diversification effect within Premium risks	-197,1	-199,8	-1,4%
Retrocession effect	-368,6	-375,0	-1,7%
Premium risk (after retrocession)	151,7	148,8	2,0%
Diversification and other effects between Reserve and Premium risk	-94,5	-98,9	-4,5%
Insurance Risk	247,3	245,6	0,7%

 Table 19 Breakdown of the underwriting risk into its main components

UNIQA Re's insurance risk is well balanced between premium risk and reserve risk, resulting in a significant diversification effect. A large part of the premium risk before retrocession is attributable to the coverage of natural hazard losses. However, retrocession also shows its greatest effect in this area, as UNIQA Re generally only bears a limited retention for each event. Retrocession is therefore the main means of reducing risk, both in terms of natural hazard losses and large losses. The losses from natural catastrophes are simulated independently of the attritional/large losses. This results in a significant diversification effect. The reserve risk is volume-driven, although there are line specific differences and the loss reserves from non-proportional treaties generally show a higher volatility (coefficient of variation) than the reserves for proportional treaties.

The target capital to cover insurance risks (centered, after diversification) increased by EUR 1.7 million compared with SST 2021. The stability of the insurance risk is due to stable attritional risks and increased larges losses being compensated by discounting effect stemming from higher yields curves. The slight decrease in natural catastrophe risk before retrocession results from the use of a new windstorm model and discounting benefits.

7.3. Risk-bearing capital

Table 20 shows the breakdown of risk-bearing capital into its main components and compares the corresponding figures with those of the previous year.

The subordinated loan of EUR 50 million (nominal value) with UNIQA Insurance Group AG (since December 2016 and prolongated in December 2021) forms an essential component of the risk-bearing capital. In December 2021, FINMA approved the inclusion of this loan as lower supplementary capital in the SST.

The risk-bearing capital for SST 2022 amounts to EUR 625.0 million, EUR 10.5 million more than in the previous year.

	SST 2022	SST 2021	Changes
Position	in EUR million	in EUR million	in %
Market-consistent value of investments	1.796,4	1.739,9	3,2%
Market-consistent value of other assets	508,6	234,0	117,3%
Best estimate of insurance liabilities	1.554,2	1.316,8	18,0%
Market-consistent value of other liabilities	87,5	65,6	33,4%
Difference between assets at market-consistent values and best estimates of liabilities	663,2	591,5	12,1%
Deductions	90,0	30,0	—
Core capital	573,2	561,5	2,1%
Supplementary capital	51,8	53,0	—
Risk bearing capital	625,0	614,5	1,7%

 Table 20 Breakdown of risk-bearing capital into its main components

Overall, the market-consistent value of assets rose from EUR 1,973.9 million to EUR 2,305.0 million (difference EUR 331.0 million), while the market-consistent value of liabilities increased from EUR 1,382.4 million to EUR 1,641,8 million (difference EUR 259.3 million). The valuation of the subordinated loan, which can be included as supplementary capital (details of which can be found in Section 5.4), slightly decreased from EUR 53.0 million to EUR 51.8 million.

The main underlying drivers for the change in risk-bearing capital are the increased market value of investments and the discounting benefit on the technical provisions with low offsetting effect from the reinsurance share.

7.4. Solvency ratio

UNIQA Re's SST ratio as at 31.12.2021 is 157,2%¹. With regard to the risks quantified in SST 2022 and the overall risk profile analysed in the ORSA, solvency is considered sufficient.

The information on solvency (risk-bearing capital, target capital) corresponds to the information which UNIQA Re submitted to FINMA and which is subject to examination.

¹ For the definition of the SST quotient, see FINMA Circular 2017/03, Margin no. 62

8.3. Report of the statutory auditors to the general meeting on the annual financial statements

UNIQA Re AG Zürich

Bericht der Revisionsstelle an die Generalversammlung

zur Jahresrechnung 2021

Bericht der Revisionsstelle

an die Generalversammlung der UNIQA Re AG

Zürich

Bericht der Revisionsstelle zur Jahresrechnung

Als Revisionsstelle haben wir die beiliegende Jahresrechnung der UNIQA Re AG bestehend aus Bilanz, Erfolgsrechnung, Geldflussrechnung und Anhang für das am 31. Dezember 2021 abgeschlossene Geschäftsjahr geprüft.

Verantwortung des Verwaltungsrates

Der Verwaltungsrat ist für die Aufstellung der Jahresrechnung in Übereinstimmung mit den gesetzlichen Vorschriften und den Statuten verantwortlich. Diese Verantwortung beinhaltet die Ausgestaltung, implementierung und Aufrechterhaltung eines Internen Kontrollsystems mit Bezug auf die Aufstellung einer Jahresrechnung, die frei von wesentlichen falschen Angaben als Folge von Verstössen oder Inftümern ist. Darüber hinaus ist der Verwaltungsrat für die Auswahl und die Anwendung sachgemässer Rechnungslegungsmethoden sowie die Vornahme angemessener Schätzungen verantwortlich.

Verantwortung der Revisionsstelle

Unsere Verantwortung ist es, aufgrund unserer Prüfung ein Prüfungsurteil über die Jahresrechnung abzugeben. Wir haben unsere Prüfung in Übereinstimmung mit dem schweizerischen Gesetz und den Schweizer Prüfungsstandards vorgenommen. Nach diesen Standards haben wir die Prüfung so zu planen und durchzuführen, dass wir hinreichende Sicherheit gewinnen, ob die Jahresrechnung frei von wesentlichen falschen Angaben ist.

Eine Prüfung beinhaltet die Durchführung von Prüfungshandlungen zur Erlangung von Prüfungshandhungen liegt im der Jahresrechnung enthaltenen Wertansätze und sonstigen Angaben. Die Auswahl der Prüfungshandlungen liegt im pflichtigemässen Ermessen des Prüfers. Dies schliesst eine Beurteilung der Risiken wesentlicher falscher Angaben in der Jahresrechnung als Folge von Verstössen oder Irrtümern ein. Bei der Beurteilung dieser Risiken berücksichtigt der Prüfer das Interne Kontrolisystem, soweit es für die Aufsteilung der Jahresrechnung von Bedeutung ist, um die den Umständen entsprechenden Prüfungshandlungen festzulegen, nicht aber um ein Prüfungsurteil über die Wirksamkeit des Internen Kontrolisystems abzugeben. Die Prüfung umfasst zudem die Beurteilung der Angemessenheit der angewandten Rechnungslegungsmethoden, der Plausibilität der vorgenommenen Schätzungen sowie eine Würdigung der Gesamtdarsteilung der Jahresrechnung. Wir sind der Auffassung, dass die von uns erlangten Prüfungsnachweise eine ausreichende und angemessene Grundlage für unser Prüfungsurteil Diden.

Prüfungsurtell

Nach unserer Beurteilung entspricht die Jahresrechnung für das am 31. Dezember 2021 abgeschlossene Geschäftsjahr dem schweizerischen Gesetz und den Statuten.

PricewaterhouseCoopers AG, Birchstrasse 160, Postfach, 8050 Zürich Telefon: +41 58 792 44 00, Telefax: +41 58 792 44 10, www.pwc.ch

YioewsterhouseCcopers AG ist Mitglied eines globalen Netzwerks von rechtlich sebständigen und voneinander unabhängigen Gesellschaften.

Berichterstattung aufgrund weiterer gesetzlicher Vorschriften

Wir bestätigen, dass wir die gesetzlichen Anforderungen an die Zulassung gemäss Revisionsaufsichtsgesetz (RAG) und die Unabhängigkeit (Art. 728 OR und Art. 11 RAG) enfülien und keine mit unserer Unabhängigkeit nicht vereinbaren Sachverhalte vorliegen.

In Übereinstimmung mit Art. 728a Abs. 1 Ziff. 3 OR und dem Schweizer Prüfungsstandard 890 bestätigen wir, dass ein gemäss den Vorgaben des Verwaitungsrates ausgestaltetes internes Kontrolisystem für die Aufstellung der Jahresrechnung existiert.

Ferner bestätigen wir, dass der Antrag über die Verwendung des Bilanzgewinnes dem schweizerischen Gesetz und den Statuten entspricht, und empfehien, die vorliegende Jahresrechnung zu genehmigen.

D. Anhang

Zahlen in EUR

Grundsätze der Rechnungslegung

Die Jahresrechnung wurde in Übereinstimmung mit den Bestimmungen über die kaufmännische Buchführung des Schweizerischen Obligationenrechts (Art. 957-963b OR, gültig ab 1. Januar 2013) erstellt. Neben dem Schweizerischen Obligationenrecht wurden auch die Bestimmungen der Verordnung der Eidgenössichen Finanzmarktaufsicht über die Beaufsichtigung von privaten Versicherungsunternehmen (Art. 5-6a AVO-FINMA, gültig ab 15. Dezember 2015) angewendet.

Funktional- und Berichtswährung Euro

Aufgrund der Tatsache, dass der grösste Teil der Geschäftstätigkeit der UNIQA Re AG in der Währung Euro stattfindet, hat sich die Gesellschaft entschlossen ihre Bücher ab dem Geschäftsjahr 2013 in Funktionalwährung Euro zu führen. Zu diesem Zweck wurden sämtliche Positionen der Bilanz per 31. Dezember 2012 mit Stichtag 1. Januar 2013 zum Kurs EUR/CHF von 1.2072 in Euro umgerechnet.

Für die Erstellung der hier vorliegenden Jahresrechnung 2021 in Berichtswährung Euro wurden die Angaben in Schweizer Franken wie folgt umgerechnet: Aktiva und Verbindlichkeiten zum Stichtagskurs EUR/CHF per 31. Dezember 2021 von 1.0331. Eigenkapital zu historischen Stichtagskursen EUR/CHF. Erfolgsrechnung sowie die Veränderung des Eigenkapitals zum Jahresdurchschnittskurs 2021 EUR/CHF von 1.0800.

Die daraus entstandene Währungskursdifferenz wird im Eigenkapital bei den Freiwilligen Gewinnreserven unter der Position "Umrechnungsdifferenz" dargestellt.

Bewertungsgrundsätze

Die Bewertung erfolgt nach einheitlichen Kriterien. Aktiven und Passiven werden einzeln bewertet.

Kapital-/Sachanlagen:

Die Immobilien und Sachanlagen werden zu Anschaffungs- oder Herstellungskosten abzüglich Abschreibungen und abzüglich Wertberichtigungen bewertet. Diese Positionen werden linear abgeschrieben.

Festverzinsliche Wertpapiere werden linear nach der Kostenamortisationsmethode bewertet, abzüglich der betriebsnotwendigen Wertberichtigung auf Positionen mit nachhaltigem Wertverlust.

Darlehen werden zum Nominalwert abzüglich Wertverminderungen bewertet. Aktien und kollektive Anlagen werden zu Anschaffungskosten oder zum tieferen Marktwert bilanziert (Niederstwertprinzip).

Versicherungstechnische Rückstellungen:

Dabei handelt es sich um Verpflichtungen gegenüber den Zedenten, die auf Basis der Rückversicherungsverträge ermittelt werden. Die Berechnung erfolgt auf der Basis der mit der FINMA vereinbarten Geschäftspläne.

n. Angaben zu den Miet- und Leasingverbindlichkeiten

Am 31. Dezember 2021 betragen die Mietverpflichtungen 4.345.997 (Vorjahr 4.859.804). Leasingverpflichtungen bestehen keine.

o. Angaben zu den Vollzeitstellen

Die Anzahl der Vollzeitstellen im Jahresdurchschnitt lag sowohl im Berichtsjahr als auch im Vorjahr über 10 aber unter 50.

Nach dem Bilanzstichtag eingetretene Ereignisse

Ende Februar ist der seit mehreren Jahren zwischen der Ukraine und Russland bestehende Konflikt eskaliert. UNIQA Re ist Rückversicherer der Konzerngesellschaften in beiden Ländern. Aufgrund der gegenwärtig noch nicht einschätzbaren und sich fortlaufend ändernden Situation ist zum Zeitpunkt der Aufstellung der Jahresrechnung keine abschliessende Beurteilung der künftigen Auswirkungen auf UNIQA möglich. Da es sich um ein wertbegründendes Ereignis handelt, welches im Jahr 2022 liegt, ergeben sich auf diesen Jahresabschluss zum 31. Dezember 2021 keine Auswirkungen. Die weitere Entwicklung der Lage wird beobachtet, und es werden bei Bedarf entsprechende Massnahmen ergriffen, um die Auswirkungen auf UNIQA Re gering zu halten.

Die Gesellschaft hat am 15. März 2022 eine Klage an das Handelsgericht Zürich eingereicht zur Einbringung einer ausstehenden Retrozessions-Forderung mit einem Streitwert in Höhe von EUR 15.7 Mio. Die Gesellschaft geht davon aus, dass die Forderung weiterhin einbringlich ist. Auf eine Wertberichtigung wurde daher verzichtet.

D. Anhang

Zahlen in CHF

Grundsätze der Rechnungslegung

Die Jahresrechnung wurde in Übereinstimmung mit den Bestimmungen über die kaufmännische Buchführung des Schweizerischen Obligationenrechts (Art. 957-963b OR, gültig ab 1. Januar 2013) erstellt. Neben dem Schweizerischen Obligationenrecht wurden auch die Bestimmungen der Verordnung der Eidgenössichen Finanzmarktaufsicht über die Beaufsichtigung von privaten Versicherungsunternehmen (Art. 5-6a AVO-FINMA, gültig ab 15. Dezember 2015) angewendet.

Funktional- und Berichtswährung Euro

Aufgrund der Tatsache, dass der grösste Teil der Geschäftstätigkeit der UNIQA Re AG in der Währung Euro stattfindet, hat sich die Gesellschaft entschlossen ihre Bücher ab dem Geschäftsjahr 2013 in Funktionalwährung Euro zu führen. Zu diesem Zweck wurden sämtliche Positionen der Bilanz per 31. Dezember 2012 mit Stichtag 1. Januar 2013 zum Kurs EUR/CHF von 1.2072 in Euro umgerechnet.

Für die Erstellung der hier vorliegenden Jahresrechnung 2021 in Berichtswährung Euro wurden die Angaben in Schweizer Franken wie folgt umgerechnet: Aktiva und Verbindlichkeiten zum Stichtagskurs EUR/CHF per 31. Dezember 2021 von 1.0331. Eigenkapital zu historischen Stichtagskursen EUR/CHF. Erfolgsrechnung sowie die Veränderung des Eigenkapitals zum Jahresdurchschnitts-

Erfolgsrechnung sowie die Veränderung des Eigenkapitals zum Jahresdurchschnittskurs 2021 EUR/CHF von 1.0800.

Die daraus entstandene Währungskursdifferenz wird im Eigenkapital bei den Freiwilligen Gewinnreserven unter der Position "Umrechnungsdifferenz" dargestellt.

Bewertungsgrundsätze

Die Bewertung erfolgt nach einheitlichen Kriterien. Aktiven und Passiven werden einzeln bewertet.

Kapital-/Sachanlagen:

Die Immobilien und Sachanlagen werden zu Anschaffungs- oder Herstellungskosten abzüglich Abschreibungen und abzüglich Wertberichtigungen bewertet. Diese Positionen werden linear abgeschrieben.

Festverzinsliche Wertpapiere werden linear nach der Kostenamortisationsmethode bewertet, abzüglich der betriebsnotwendigen Wertberichtigung auf Positionen mit nachhaltigem Wertverlust.

Darlehen werden zum Nominalwert abzüglich Wertverminderungen bewertet. Aktien und kollektive Anlagen werden zu Anschaffungskosten oder zum tieferen Marktwert bilanziert (Niederstwertprinzip).

Versicherungstechnische Rückstellungen:

Dabei handelt es sich um Verpflichtungen gegenüber den Zedenten, die auf Basis der Rückversicherungsverträge ermittelt werden. Die Berechnung erfolgt auf der Basis der mit der FINMA vereinbarten Geschäftspläne.

n. Angaben zu den Miet- und Leasingverbindlichkeiten

Am 31. Dezember 2021 betragen die Mietverpflichtungen 4.489.850 (Vorjahr 5.020.664). Leasingverpflichtungen bestehen keine.

o. Angaben zu den Vollzeitstellen

Die Anzahl der Vollzeitstellen im Jahresdurchschnitt lag sowohl im Berichtsjahr als auch im Vorjahr über 10 aber unter 50.

Nach dem Bilanzstichtag eingetretene Ereignisse

Ende Februar ist der seit mehreren Jahren zwischen der Ukraine und Russland bestehende Konflikt eskaliert. UNIQA Re ist Rückversicherer der Konzerngesellschaften in beiden Ländern. Aufgrund der gegenwärtig noch nicht einschätzbaren und sich fortlaufend ändernden Situation ist zum Zeitpunkt der Aufstellung der Jahresrechnung keine abschliessende Beurteilung der künftigen Auswirkungen auf UNIQA möglich. Da es sich um ein wertbegründendes Ereignis handelt, welches im Jahr 2022 liegt, ergeben sich auf diesen Jahresabschluss zum 31. Dezember 2021 keine Auswirkungen. Die weitere Entwicklung der Lage wird beobachtet, und es werden bei Bedarf entsprechende Massnahmen ergriffen, um die Auswirkungen auf UNIQA Re gering zu halten.

Die Gesellschaft hat am 15. März 2022 eine Klage an das Handelsgericht Zürich eingereicht zur Einbringung einer ausstehenden Retrozessions-Forderung mit einem Streitwert in Höhe von EUR 15.7 Mio. Die Gesellschaft geht davon aus, dass die Forderung weiterhin einbringlich ist. Auf eine Wertberichtigung wurde daher verzichtet.

E. Antrag über die Verwendung des Bilanzgewinnes	31.12.2021 EUR	31.12.2021 CHF
Gewinnvortrag aus dem Vorjahr	62.250.269	74.620.475
Gewinn des Geschäftsjahres	69.328.536	74.874.818
Bilanzgewinn / -verlust	131.578.805	149.495.293
Verwendung:		
Dividendenausschüttung	90.000.000	92.979.000
Vortrag auf neue Rechnung	41.578.805	56.516.293

Da die gesetzlichen Gewinnreserven 50% des Aktienkapitals erreicht haben, wird auf eine weitere Zuweisung verzichtet.
